Half-Year Financial Review — Sample Traders Private Limited (fictional)

Period: **H1 FY2025-26** (2025-04-01 to 2025-09-30) compared with **H1 FY2024-25** · Basis: accrual · Currency: INR · Run FA-20261104-081719 · Generated 2026-11-04T13:47:19+05:30 (IST)

> **Status: Calculations verified; open data issues, unresolved reconciliation exceptions and partial or data-limited figures remain.** Calculations: independently recomputed on 2026-11-04T13:47:21+05:30 (IST), 24/24 verification checks passed (passed). Data validation: 0 critical, 1 high, 3 medium, 0 low open issue(s) (1 informational); 3 unresolved reconciliation exception(s); 3 partial, 0 blocked, 0 needs-data calculation(s).

Executive summary

- Net revenue was ₹1.18 crore, up 19.2% on the comparison half-year (₹99.00 lakh).
- Gross margin was 35.6% against 34.5%; net profit was ₹10.88 lakh.
- Cash at bank was ₹12.80 lakh; the bank statement and the books differ and need a bank reconciliation.
- One marketplace settlement with an expected net value of ₹2.46 lakh ⚠ was not found in the bank data provided.

Key metrics

Metric	H1 FY2025-26	H1 FY2024-25	Readiness

Debt-to-equity	0.74	—	ready
Cash runway	N/A	—	ready

Findings by evidence class

Verified findings use only calculations that are ready and are not scenarios. Exceptions, estimates and hypotheses are kept separate and are not facts.

Verified findings

1. Revenue grew faster than operating expenses (19.2% against 16.3%), so EBITDA margin rose to 14.4%.
   evidence: metric:revenue_growth, metric:expense_growth, metric:ebitda_margin
2. Receivables of ₹4.00 lakh are more than 180 days past due, all from one customer.
   evidence: metric:ar_aging[bucket=181_365]
3. A bill from a supplier classified as micro is outstanding beyond 45 days; payment timing should be reviewed with your Chartered Accountant.
   evidence: check:ai_msme_payables_timing
4. ₹7.00 lakh of receivables (31.8%) is more than 90 days past due; the largest amount is with Coastal Traders (₹4.00 lakh). *(auto-generated)*
   evidence: CALC-0170, CALC-0171, CALC-0172
5. Sunrise Retail accounts for 35.0% of sales register value; open receivables from Sunrise Retail are ₹6.00 lakh. *(auto-generated)*
   evidence: CALC-0180, CALC-0183
6. Revenue from operations is ₹7.00 lakh below budget (-5.6%). *(auto-generated)*
   evidence: CALC-0184, metric:budget_variance[account_class=revenue_from_operations,measure=variance_pct]
7. Bills of ₹3.00 lakh from suppliers classified micro/small are outstanding beyond 45 days (oldest 91 days). *(auto-generated)*
   evidence: CALC-0185, CALC-0187, check:ai_msme_payables_timing

8. Marketplace fees grew 14.1% faster than revenue (increase ₹1.00 lakh). *(auto-generated)*
   evidence: CALC-0189, metric:cost_category_variance[account_class=marketplace_fees,measure=amount]
9. Marketplace fees is ₹50,000.00 above budget (14.3%). *(auto-generated)*
   evidence: CALC-0191, metric:budget_variance[account_class=marketplace_fees,measure=variance_pct]
10. Employee benefits expense is ₹1.00 lakh above budget (7.1%). *(auto-generated)*
    evidence: CALC-0192, metric:budget_variance[account_class=employee_benefits_expense,measure=variance_pct]
11. Advertising grew 14.1% faster than revenue (increase ₹50,000.00). *(auto-generated)*
    evidence: CALC-0204, metric:cost_category_variance[account_class=advertising,measure=amount]

Unresolved reconciliation exceptions

- Settlement GX-SET-0002 (gateway_x): probable match
- Settlement MA-SET-0003 (marketplace_a): unmatched — within the 5-day timing window
- CON-BANK-BOOK: cash and bank balance at 2025-09-30 — explained pending brs
- The bank statement differs from the book balance by -₹20,000.00 at period end; book-side bank ledger lines are requested to explain it. *(auto-generated)*
  evidence: CALC-0193, CON-BANK-BOOK
- Settlement MA-SET-0003 from marketplace_a with expected net ₹2.46 lakh was not located in the bank data provided (5 days after the settlement date at period end). This is within the 5-day timing window, so it is treated as a timing difference (possibly in transit), not a loss; later bank lines are requested. *(auto-generated)*
  evidence: CALC-0194, CALC-0195

Estimates and scenarios (not facts)

1. Collecting the receivables more than 90 days past due (₹7.00 lakh) would raise cash to ₹19.80 lakh.
   evidence: metric:rx_ar_overdue_total[threshold_days=90], metric:scn_collect_overdue_cash
2. Scenario (receivables): collecting it in full would raise cash to ₹19.80 lakh; DSO would be 21 days instead of 26 days. *(auto-generated)*
   evidence: CALC-0176, CALC-0177, metric:dso
3. Scenario (MSME bills): paying them now would leave cash at ₹9.80 lakh. *(auto-generated)*
   evidence: CALC-0188
4. Indicative only: ₹42,424.24 of the marketplace fees increase is above what revenue growth alone would explain. This is not evidence that the amount can be reduced; vendor or contract evidence is needed. *(auto-generated)*
   evidence: CALC-0190
5. If all unlocated settlements are received, cash would be ₹15.26 lakh (scenario). *(auto-generated)*
   evidence: CALC-0203
6. Indicative only: ₹21,212.12 of the advertising increase is above what revenue growth alone would explain. This is not evidence that the amount can be reduced; vendor or contract evidence is needed. *(auto-generated)*
   evidence: CALC-0205

Hypotheses to test

1. Hypothesis: the faster growth of marketplace fees may reflect a rate or contract change rather than volume; vendor bills would confirm or reject this. *(auto-generated)*
   evidence: CALC-0189
2. Hypothesis: the faster growth of advertising may reflect a rate or contract change rather than volume; vendor bills would confirm or reject this. *(auto-generated)*
   evidence: CALC-0204

Data gaps affecting results

1. DPO uses COGS as its denominator; a purchase register would make DPO and the cash conversion cycle exact. *(auto-generated)*
   evidence: CALC-0109, metric:dpo

Recommendations

1. Follow up the receivable more than 180 days past due

It is ₹4.00 lakh from a single customer and older balances are harder to collect.

- Expected impact: Up to ₹4.00 lakh of cash if collected in full.
- Confidence: medium; effort: low
- Evidence: metric:ar_aging[bucket=181_365]

2. Raise a query on the missing marketplace settlement

Settlement MA-SET-0003 was not located in the bank data provided; it may be in transit or unpaid.

- Expected impact: Up to ₹2.46 lakh ⚠ of expected cash.
- Confidence: medium; effort: low
- Evidence: metric:settlement_variance, check:ai_settlement_reconciliation

3. Prepare the bank reconciliation for the period end

Book and statement balances differ; a bank reconciliation statement should explain the difference before the cash figure is relied on.

- Confidence: high; effort: low
- Evidence: CON-BANK-BOOK, check:ai_cash_movement

Profit and loss

Proactive insights (Reflex Engine)

Ran automatically after the analysis, inside this task only (no background monitoring). Rules evaluated: 11; triggers found: 12; investigated: 10; suppressed: 0; deferred: 1; approvals pending: 3. Everything below was computed read-only from the data provided; nothing was sent, uploaded, paid or posted.

Triggered findings

#	Finding	Rule(s)	Severity	Confidence
1	Receivables more than 90 days past due	rx_overdue_receivables	high	0.90
2	High dependence on Sunrise Retail	rx_customer_concentration	medium	0.90
3	Revenue from operations is unfavourable to budget	rx_budget_overrun	medium	0.90
4	MSME supplier bills outstanding beyond 45 days	rx_msme_payables_timing	medium	0.90
5	Marketplace fees grew faster than revenue; Marketplace fees is unfavourable to budget	rx_cost_category_spike, rx_budget_overrun	medium	0.90
6	Employee benefits expense is unfavourable to budget	rx_budget_overrun	medium	0.90
7	Bank and book balances differ at period end	rx_bank_book_difference	medium	0.90
8	Settlement MA-SET-0003 not yet in bank data (within the 5-day timing window)	rx_settlement_shortfall	low	0.60
9	Advertising grew faster than revenue	rx_cost_category_spike	low	0.90
10	DPO uses COGS because credit purchases are not available	rx_partial_metric_upgrade	low	0.90

Insights from these investigations appear under Findings by evidence class.

Scenarios (deterministic what-ifs)

Scenario	Result	Formula / assumption
scn_collect_overdue_cash	₹19.80 lakh	Overdue receivables collected in full; nothing else changes.
scn_collect_overdue_dso	21 days	((opening AR + closing AR - overdue) / 2) / credit_sales * days
scn_collect_overdue_dso_change	-5 days	scn_collect_overdue_dso - dso
scn_dso_reduction_cash_release [dso_reduction_days=10]	₹7.74 lakh	dso_reduction_days * credit_sales_incl_tax / days(period)
scn_msme_clearance_cash_after	₹9.80 lakh	All flagged MSME bills paid now.

Scenario	Result	Formula / assumption
scn_cost_normalisation_saving [account_class=marketplace_fees]	₹42,424.24	Indicative gap between actual growth and revenue-proportional growth; not evidence that any reduction is achievable.
scn_settlement_recovery_cash	₹15.26 lakh	All unlocated settlements are received.
scn_cost_normalisation_saving [account_class=advertising]	₹21,212.12	Indicative gap between actual growth and revenue-proportional growth; not evidence that any reduction is achievable.

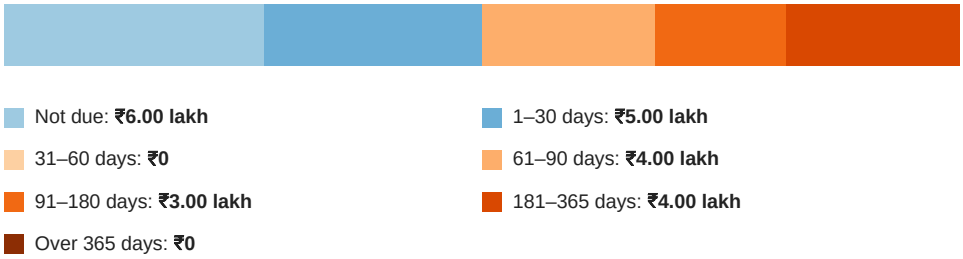

Prioritised actions (auto-generated)

Rank	Action	Expected impact	Impact	Confidence	Effort	Priority	Approval
1	Collect receivables more than 90 days past due, starting with Coastal Traders	Up to ₹7.00 lakh of cash if collected in full (upper bound).	high	high	low	3.00	APR-7fe2ac34a2dc (pending approval)
2	Review and schedule payment of MSME supplier bills beyond 45 days — review with your CA	Exposure ₹3.00 lakh.	high	high	low	3.00	APR-62d4db6079f2 (pending approval)
3	Confirm receipt of settlement MA-SET-0003 or raise a query with marketplace_a	Up to ₹2.46 lakh of cash if it is still outstanding (upper bound).	high	medium	low	2.10	APR-004652098706 (pending approval)
4	Close the revenue gap to budget	₹7.00 lakh against plan (measured).	high	high	medium	1.50	not needed
5	Review credit terms and dependence on Sunrise Retail	Exposure in open receivables ₹6.00 lakh.	high	high	high	1.00	not needed
6	Bring employee benefits expense back within budget	₹1.00 lakh against plan (measured).	medium	high	medium	1.00	not needed
7	Bring marketplace fees back within budget	₹50,000.00 against plan (measured).	medium	high	medium	1.00	not needed
8	Prepare the period-end bank reconciliation statement	Confirms the cash figure used in this report.	low	high	low	1.00	not needed
9	Review marketplace fees spend and contracts	Indicative gap ₹42,424.24 above revenue-proportional growth; confirm with vendor or contract evidence before treating any amount as recoverable.	low	high	medium	0.50	not needed
10	Review advertising spend and contracts	Indicative gap ₹21,212.12 above revenue-proportional growth; confirm with vendor or contract evidence before treating any amount as recoverable.	low	high	medium	0.50	not needed

Settlements: gross to expected net

Grey-blue steps are recoverable tax credits or reversals, not losses

Source: calculation register, run period H1 FY2025-26; values bound to calc_ids.

Settlements: gross to expected net

Data: Gross ₹10.00 lakh; Fees (cost) ₹1.00 lakh; GST on fees (credit) ₹18,000.00; Refunds (reversal) ₹30,000.00; TCS/TDS (tax credit) ₹4,000.00; Adjustments ₹0.00; Expected net ₹8.48 lakh

Cost growth above revenue growth

Category growth minus revenue growth (percentage points)

Source: calculation register, run period H1 FY2025-26; values bound to calc_ids.

Cost growth above revenue growth

Data: Marketplace fees 14.1%; Advertising 14.1%

Additional data requested (read-only)

- REQ-7ca894904c1e (requested): supplier_bills by vendor from accounting system (vendor bills) → vendor-level drill-down (analysed by the agent; not a canonical file in v0.1). Identify which vendors or contracts drove the increase in marketplace fees.
- REQ-f860afb809d6 (requested): bank ledger lines (book side) from accounting system (bank ledger) → journal_lines.csv (bank account lines) — used by the agent to prepare a BRS outside the verified report. Identify uncleared cheques, deposits in transit or unrecorded bank charges (toolkit v0.1 does not implement rec_accounting_to_bank).
- REQ-ebb9e15ae43e (requested): bank_transactions from bank statement or authorised bank connector → bank_transactions.csv (append lines after the period end). Check whether settlement MA-SET-0003 arrived after the period end (timing) or is missing.
- REQ-50d29720adb5 (requested): supplier_bills by vendor from accounting system (vendor bills) → vendor-level drill-down (analysed by the agent; not a canonical file in v0.1). Identify which vendors or contracts drove the increase in advertising.
- REQ-d4c861b987ce (requested): credit purchases including GST from accounting system (purchase register) → run_config.json: credit_purchases_incl_tax. Makes DPO and the cash conversion cycle ready instead of partial.

Approvals needed before any external or financial action

- APR-7fe2ac34a2dc (external action, pending approval): Draft payment reminder emails to customers with invoices more than 90 days past due. On approval: The plugin prepares draft reminders in prepared/; nothing is sent until you send it or approve sending separately.
- APR-62d4db6079f2 (financial write, pending approval): Prepare a payment proposal for MSME bills beyond the statutory period. On approval: The plugin prepares prepared/msme_payment_proposal.csv. It never makes payments; you execute any payment in your own bank.
- APR-004652098706 (external action, pending approval): Draft a query to marketplace_a about settlement MA-SET-0003. On approval: The plugin prepares a draft query in prepared/; you send it.

Suppressed and deferred

- Deferred: data_gap:probable_settlement_matches — rx_partial_metric_upgrade (limit_reached:max_triggers)

Data quality and accounting integrity

Issues by severity: high 1, medium 3, informational 1.

Issue	Check	Severity	Description
ISS-0001	dq_date_gaps	medium	Account XXXX1234: 7 gap(s) longer than 10 days without statement lines - confirm no statement pages are missing.
ISS-0002	ai_msme_payables_timing	medium	1 bill(s) from suppliers classified micro/small are outstanding more than 45 days after bill date. Flag for professional review of payment-timing implications; applicability depends on supplier registration, activity and agreed terms.
ISS-0003	ai_msme_payables_timing	informational	1 open bill(s) have no MSME classification; MSME timing could not be assessed for them.
ISS-0004	ai_settlement_reconciliation	high	1 settlement(s) not found in bank credits and 0 conflicting; expected net value not located in the bank data provided: ₹2.46 lakh.
ISS-0005	ai_cash_movement	medium	cash and bank balance at 2025-09-30: sources differ by -₹20,000.00 (timing_or_unrecorded_items_requires_brs). Both figures are shown; bank statement (source_of_truth.policies.bank_balances) is used.

Limitations — what could not be fully analysed

- Days payables outstanding (`dpo`, H1 FY2025-26): **partial** — Alternative input: COGS used as denominator (payables include GST and non-inventory purchases); provide credit purchases including GST for a ready DPO.
- Cash conversion cycle (`cash_conversion_cycle`, H1 FY2025-26): **partial** — Inherits DSO/DPO limitations.
- Settlement variance (`settlement_variance`, H1 FY2025-26): **partial** — Unmatched settlements may be in transit or missing; a non-zero variance is a lead for review, not proof of platform error.; Includes probable (not confirmed) matches.

Metric	Definition (formula)	Basis
Gross revenue (`gross_revenue`)	ledger(revenue_from_operations, period)	accrual, amounts excl. GST
Sales returns & allowances (`sales_returns_and_allowances`)	ledger(sales_returns_and_allowances, period)	accrual, amounts excl. GST

Metric	Definition (formula)	Basis
Net revenue (`net_revenue`)	gross_revenue + ledger(other_operating_revenue) - sales_returns_and_allowances	accrual, amounts excl. GST
Cost of goods sold (`cogs`)	ledger(cost_of_revenue classes, period)	accrual, amounts excl. GST
Gross profit (`gross_profit`)	net_revenue - cogs	accrual, amounts excl. GST
Gross margin (`gross_margin`)	gross_profit / net_revenue	accrual
Operating expenses (excl. D&A) (`operating_expenses`)	ledger(operating expense classes, period)	accrual, amounts excl. GST
EBITDA (`ebitda`)	gross_profit - operating_expenses	accrual, amounts excl. GST
EBITDA margin (`ebitda_margin`)	ebitda / net_revenue	accrual
Operating profit (`operating_profit`)	ebitda - ledger(depreciation_and_amortisation)	accrual, amounts excl. GST
Operating margin (`operating_margin`)	operating_profit / net_revenue	accrual
Profit before tax (`profit_before_tax`)	operating_profit + other_income - finance_costs - (exceptional + prior_period + fx)	accrual, amounts excl. GST
Profit after tax (net profit) (`net_profit`)	profit_before_tax - tax expense	accrual, amounts excl. GST
Net margin (after tax) (`net_margin`)	net_profit / net_revenue	accrual
Effective tax rate (books) (`effective_tax_rate`)	tax expense / profit_before_tax	accrual
Cost-to-revenue ratio (`cost_to_revenue_ratio`)	(cogs + operating_expenses) / net_revenue	accrual
Expenses by category (`expense_by_category`)	group_by(ledger(expense classes), class)	accrual, amounts excl. GST
Revenue growth (`revenue_growth`)	(net_revenue[P] - net_revenue[C]) / abs(net_revenue[C])	accrual
Operating expense growth (`expense_growth`)	(operating_expenses[P] - operating_expenses[C]) / abs(operating_expenses[C])	accrual
Change vs comparison (`period_over_period_variance`)	gross_revenue[P] - gross_revenue[C]	accrual, amounts excl. GST
Cost category variance (`cost_category_variance`)	actual_k[P] - actual_k[C]	accrual, amounts excl. GST
Trade receivables (`accounts_receivable`)	balance(trade_receivables, as_of)	accrual, amounts excl. GST
Trade payables (`accounts_payable`)	balance(trade payable classes, as_of)	accrual, amounts excl. GST
Inventory (`inventory_value`)	balance(inventories, as_of)	accrual, amounts excl. GST
Working capital (`working_capital`)	balance(current_assets) - balance(current_liabilities)	accrual, amounts excl. GST
Current ratio (`current_ratio`)	current_assets / current_liabilities	accrual
Quick ratio (`quick_ratio`)	(current_assets - inventories - prepaid_expenses) / current_liabilities	accrual
Outstanding borrowings (`outstanding_debt`)	balance(borrowing classes, as_of)	accrual, amounts excl. GST

Metric	Definition (formula)	Basis
Finance costs (`finance_costs`)	ledger(finance_costs, period)	accrual, amounts excl. GST
Interest coverage (`interest_coverage_ratio`)	operating_profit / finance_costs	accrual
Debt-to-equity (`debt_to_equity`)	outstanding_debt / (equity + unappropriated current profit)	accrual
Inventory turnover (`inventory_turnover`)	cogs / avg_balance(inventories)	accrual
Days inventory outstanding (`dio`)	avg_balance(inventories) / cogs * days(period)	accrual
Days sales outstanding (`dso`)	avg_balance(trade_receivables) / credit_sales_incl_tax * days(period)	accrual
Days payables outstanding (`dpo`)	avg_balance(trade_payables) / credit_purchases_incl_tax * days(period)	accrual
Cash conversion cycle (`cash_conversion_cycle`)	dio + dso - dpo	accrual
Cash and bank balance (`cash_balance`)	sum(latest statement balance per account on/before as_of)	cash, amounts excl. GST
Average monthly net burn (`net_burn`)	-mean(monthly net cash change, last 3 months) if negative	cash, amounts excl. GST
Receivables aging (`ar_aging`)	sum(open balance where days past due in bucket)	accrual, amounts excl. GST
Payables aging (`ap_aging`)	sum(open balance where days past due in bucket)	accrual, amounts excl. GST
Revenue by customer (`revenue_by_customer`)	group_by(sales register taxable value, customer_id)	accrual, amounts excl. GST
Revenue by product (`revenue_by_product`)	group_by(sales register taxable value, sku)	accrual, amounts excl. GST
Revenue by channel (`revenue_by_channel`)	group_by(sales register taxable value, channel)	accrual, amounts excl. GST
Customer concentration (`customer_concentration`)	sum(top 1 customers) / total	accrual
Budget variance (`budget_variance`)	actual - budget; pct = variance / abs(budget)	accrual, amounts excl. GST
Marketplace / gateway fees (`marketplace_fees`)	sum(settlement fee components excl. GST on fees)	accrual, amounts excl. GST
Settlement variance (`settlement_variance`)	timing: unmatched within settlement_to_bank_days; unexplained: beyond the window or conflicting	accrual, amounts excl. GST
rx_ar_overdue_total (`rx_ar_overdue_total`)	sum(amount_outstanding where as_of - due_date > threshold_days)	accrual, amounts excl. GST
rx_ar_overdue_share (`rx_ar_overdue_share`)	rx_ar_overdue_total / total open receivables	accrual
rx_ar_overdue_by_customer (`rx_ar_overdue_by_customer`)	rx_ar_overdue_total grouped by customer	accrual, amounts excl. GST
rx_customer_revenue_share (`rx_customer_revenue_share`)	customer taxable sales / total sales register	accrual
scn_collect_overdue_cash (`scn_collect_overdue_cash`)	cash_balance + rx_ar_overdue_total	accrual, amounts excl. GST
scn_collect_overdue_dso (`scn_collect_overdue_dso`)	((opening AR + closing AR - overdue) / 2) / credit_sales * days	accrual

Metric	Definition (formula)	Basis
scn_collect_overdue_dso_change (`scn_collect_overdue_dso_change`)	scn_collect_overdue_dso - dso	accrual
scn_dso_reduction_cash_release (`scn_dso_reduction_cash_release`)	dso_reduction_days * credit_sales_incl_tax / days(period)	accrual, amounts excl. GST
rx_customer_open_receivables (`rx_customer_open_receivables`)	sum(amount_outstanding) for the customer	accrual, amounts excl. GST
rx_budget_shortfall (`rx_budget_shortfall`)	abs(unfavourable budget variance)	accrual, amounts excl. GST
rx_msme_overdue_total (`rx_msme_overdue_total`)	sum(outstanding) for micro/small suppliers beyond max_days	accrual, amounts excl. GST
rx_msme_overdue_by_supplier (`rx_msme_overdue_by_supplier`)	rx_msme_overdue_total grouped by supplier	accrual, amounts excl. GST
rx_msme_max_days (`rx_msme_max_days`)	max(as_of - bill_date)	accrual
scn_msme_clearance_cash_after (`scn_msme_clearance_cash_after`)	cash_balance - rx_msme_overdue_total	accrual, amounts excl. GST
rx_cost_growth_gap (`rx_cost_growth_gap`)	category growth - revenue_growth	accrual
scn_cost_normalisation_saving (`scn_cost_normalisation_saving`)	actual_k[P] - actual_k[C] * (1 + revenue_growth)	accrual, amounts excl. GST
rx_bank_book_difference (`rx_bank_book_difference`)	bank statement balance - book cash_and_cash_equivalents	accrual, amounts excl. GST
rx_settlement_unlocated (`rx_settlement_unlocated`)	expected net not located in bank credits	accrual, amounts excl. GST
rx_settlement_days_unlocated (`rx_settlement_days_unlocated`)	as_of - settlement_date	accrual
rx_settlement_component (`rx_settlement_component`)	sum(gross_amount) of settlements in the period	accrual, amounts excl. GST
scn_settlement_recovery_cash (`scn_settlement_recovery_cash`)	cash_balance + sum(unlocated settlements)	accrual, amounts excl. GST

Disclaimer

This analysis is prepared from the data you authorised and provided, using documented methods. It is decision support, not an audit, review, tax, legal or investment opinion. Figures labelled estimate, forecast or hypothesis carry uncertainty. Please review material decisions, tax matters and statutory filings with your Chartered Accountant or other qualified adviser.

GST and income-tax data checks test consistency between datasets only and do not confirm compliance or filing correctness. Items listed for review are screening results, not findings of wrongdoing.

Verification

Check	Status	Details
ver_no_fabrication	passed	all inputs exist with matching hashes
ver_recompute_figures	passed	82 figures recomputed independently and matched
ver_register_tieout	passed	244 rendered figures tie to the register
ver_placeholders_resolved	passed	none left
ver_narrative_raw_numbers	passed	narrative uses placeholders for all figures
ver_cross_footing	passed	statement, aging, budget and variance identities hold
ver_claim_evidence	passed	every finding and recommendation cites valid evidence
ver_claim_topic_consistency	passed	cited figures match the topics mentioned
ver_direction_words	passed	no contradictions found
ver_limitations_disclosed	passed	every non-ready metric is listed under Limitations
ver_masking	passed	no unmasked identifiers detected
ver_boundary_language	passed	no prohibited assurance language
ver_disclaimers	passed	standard disclaimer present
ver_double_count_guard	passed	no bank line or settlement counted twice
ver_conflict_figures	passed	conflict figures recompute
ver_status_consistency	passed	status line counts equal the issue, reconciliation and calculation registers
ver_profit_labels	passed	every profit mention names its level and cites it
ver_savings_claims	passed	no unsupported savings claims
ver_leakage_classification	passed	no recoverable, reversal or timing item called leakage
ver_evidence_separation	passed	verified findings, exceptions, estimates and hypotheses are separated
ver_source_trace	passed	75 figure(s) traced to accounts or source rows and re-added
ver_excel_formulas	passed	60 formulas evaluated independently, 60 equal their register values; LibreOffice: ok (60 compared, 0 mismatches)
ver_chart_data	passed	26 charted value(s) match the register
ver_approval_gates	passed	no external or financial action executed; prepared files match approvals
