Financial Analysis Report — Quarter Test Co (fictional)

Period: **Q4 FY2025-26** (2026-01-01 to 2026-03-31) · Basis: accrual · Currency: INR · Run FA-20261104-081725 · Generated 2026-11-04T13:47:25+05:30 (IST)

> **Status: Calculations verified; some figures are blocked by critical data issues.** Calculations: independently recomputed on 2026-11-04T13:47:27+05:30 (IST), 24/24 verification checks passed (passed). Data validation: 1 critical, 0 high, 0 medium, 0 low open issue(s) (0 informational); 0 unresolved reconciliation exception(s); 4 partial, 45 blocked, 14 needs-data calculation(s).

Executive summary

No narrative summary was supplied; key metrics follow.

Key metrics

Metric	Q4 FY2025-26	Readiness
Net revenue	₹33.00 lakh	ready
Gross margin	40.9%	ready
EBITDA margin	22.4%	ready
Profit before tax (no tax provision booked)	₹5.90 lakh	ready
Cash and bank balance	₹11.40 lakh ⚠	partial ⚠
Current ratio	N/M	ready
Days sales outstanding	0 days ⚠	partial ⚠
Cash conversion cycle	0 days ⚠	partial ⚠
Debt-to-equity	0.00	ready
Cash runway	needs data	needs data

Findings by evidence class

Verified findings use only calculations that are ready and are not scenarios. Exceptions, estimates and hypotheses are kept separate and are not facts.

Verified findings

No verified findings were stated for this run.

Unresolved reconciliation exceptions

None.

Estimates and scenarios (not facts)

None.

Hypotheses to test

None.

Data gaps affecting results

1. Critical data issues (ISS-0001) block 15 metric(s); figures that depend on them are withheld rather than estimated. *(auto-generated)*
   evidence: ISS-0001
2. The cash figure is a book balance not yet verified against a bank statement. *(auto-generated)*
   evidence: CALC-0079
3. DPO uses COGS as its denominator; a purchase register would make DPO and the cash conversion cycle exact. *(auto-generated)*
   evidence: CALC-0077, metric:dpo
4. Profit after tax is not stated because no tax provision is booked; profit before tax is shown under its own label. *(auto-generated)*
   evidence: CALC-0013

Recommendations

No recommendations were supplied for this run.

Profit and loss

Line (₹ in lakhs)	Q4 FY2025-26
Gross revenue	33.00
Less: returns & allowances	0.00
Net revenue	33.00
Cost of goods sold	19.50
Gross profit	13.50
Operating expenses (excl. D&A)	6.10
EBITDA	7.40
Operating profit	5.90
Profit before tax	5.90
Profit after tax (net profit)	needs data

Margin	Q4 FY2025-26
Gross margin	40.9%
EBITDA margin	22.4%
Operating margin	17.9%
Net margin (after tax)	needs data
Cost-to-revenue ratio	77.6%

Monthly profit and loss

Withheld: the sub-period trial balances do not reconcile to the period total (ISS-0001). Period figures above come from the period trial balance.

Expenses by category

Category (₹ in lakhs)	Q4 FY2025-26
Depreciation and amortisation	1.50
Employee benefits expense	6.10
Purchases of stock in trade	19.50

Liquidity, working capital and debt

Balance at 2026-03-31 (₹ in lakhs)	Amount
Cash and bank (statement)	11.40 ⚠
Trade receivables	0.00
Inventory	0.00
Trade payables	0.00
Working capital	11.40
Operating working capital	0.00
Outstanding borrowings	0.00

Indicator	Value	Readiness
Current ratio	N/M	ready
Quick ratio	N/M	ready
Days sales outstanding	0 days ⚠	partial ⚠
Days payables outstanding	0 days ⚠	partial ⚠

Indicator	Value	Readiness
Cash conversion cycle	0 days ⚠	partial ⚠
Interest coverage	N/A	ready
Debt-to-equity	0.00	ready
Average monthly net burn	needs data	needs data
Cash runway	needs data	needs data

Proactive insights (Reflex Engine)

Ran automatically after the analysis, inside this task only (no background monitoring). Rules evaluated: 11; triggers found: 4; investigated: 4; suppressed: 0; deferred: 0; approvals pending: 0. Everything below was computed read-only from the data provided; nothing was sent, uploaded, paid or posted.

Triggered findings

#	Finding	Rule(s)	Severity	Confidence
1	Critical data issues block part of the analysis	rx_critical_data_blockers	critical	0.90
2	Cash balance is a book figure without a bank statement	rx_partial_metric_upgrade	low	0.90
3	DPO uses COGS because credit purchases are not available	rx_partial_metric_upgrade	low	0.90
4	Profit after tax not stated: no tax provision booked	rx_partial_metric_upgrade	low	0.90

Insights from these investigations appear under Findings by evidence class.

Prioritised actions (auto-generated)

Rank	Action	Expected impact	Impact	Confidence	Effort	Priority	Approval
1	Re-export the affected source data and re-run the analysis	Unblocks the withheld metrics.	low	high	low	1.00	not needed

Additional data requested (read-only)

- REQ-902be2c7beb2 (requested): corrected source export from accounting system or customer export → the dataset named in the issue. Critical issues ISS-0001 block dependent metrics; a corrected export is needed.
- REQ-1e49ee63c417 (requested): bank_transactions from bank statement or authorised bank connector → bank_transactions.csv. Cash is a book balance; a statement verifies it.
- REQ-91fc3cb6ab90 (requested): credit purchases including GST from accounting system (purchase register) → run_config.json: credit_purchases_incl_tax. Makes DPO and the cash conversion cycle ready instead of partial.
- REQ-cb9861497ada (requested): tax provision for the period from accounting system or Chartered Accountant → trial_balance.csv (current_tax / deferred_tax lines). Net profit is before tax because no provision is booked; tax is never estimated.

Data quality and accounting integrity

Issues by severity: critical 1.

Issue	Check	Severity	Description
ISS-0001	ai_period_rollup	critical	Sub-period trial balances do not roll up to Q4 FY2025-26: profit after all booked expenses by sub-period 2026-01 100000.00, 2026-02 200000.00, 2026-03 240000.00 vs period 590000.00 (difference 50000.00). The monthly breakdown is withheld; period totals come from the period trial balance.

Limitations — what could not be fully analysed

- Profit after tax (net profit) (`net_profit`, Q4 FY2025-26): **needs data** — No tax provision booked for the period: profit after tax (net profit) is not stated; profit before tax is shown under its own label. Tax is never estimated.
- Net margin (after tax) (`net_margin`, Q4 FY2025-26): **needs data** — No tax provision booked for the period: profit after tax (net profit) is not stated; profit before tax is shown under its own label. Tax is never estimated.

- Effective tax rate (books) (`effective_tax_rate`, Q4 FY2025-26): **needs data** — Book measure only; not a tax computation.; No tax provision booked for the period: profit after tax (net profit) is not stated; profit before tax is shown under its own label. Tax is never estimated.
- Gross revenue (`gross_revenue`, 2026-01): **blocked** — blocked by critical issue(s) ISS-0001
- Sales returns & allowances (`sales_returns_and_allowances`, 2026-01): **blocked** — blocked by critical issue(s) ISS-0001
- Net revenue (`net_revenue`, 2026-01): **blocked** — blocked by critical issue(s) ISS-0001
- Cost of goods sold (`cogs`, 2026-01): **blocked** — blocked by critical issue(s) ISS-0001
- Gross profit (`gross_profit`, 2026-01): **blocked** — blocked by critical issue(s) ISS-0001
- Gross margin (`gross_margin`, 2026-01): **blocked** — blocked by critical issue(s) ISS-0001
- Operating expenses (excl. D&A) (`operating_expenses`, 2026-01): **blocked** — blocked by critical issue(s) ISS-0001
- EBITDA (`ebitda`, 2026-01): **blocked** — blocked by critical issue(s) ISS-0001; Non-GAAP measure; other income excluded.
- EBITDA margin (`ebitda_margin`, 2026-01): **blocked** — blocked by critical issue(s) ISS-0001
- Operating profit (`operating_profit`, 2026-01): **blocked** — blocked by critical issue(s) ISS-0001
- Operating margin (`operating_margin`, 2026-01): **blocked** — blocked by critical issue(s) ISS-0001
- Profit before tax (`profit_before_tax`, 2026-01): **blocked** — blocked by critical issue(s) ISS-0001
- Profit after tax (net profit) (`net_profit`, 2026-01): **blocked** — blocked by critical issue(s) ISS-0001; No tax provision booked for the period: profit after tax (net profit) is not stated; profit before tax is shown under its own label. Tax is never estimated.
- Net margin (after tax) (`net_margin`, 2026-01): **blocked** — blocked by critical issue(s) ISS-0001; No tax provision booked for the period: profit after tax (net profit) is not stated; profit before tax is shown under its own label. Tax is never estimated.
- Effective tax rate (books) (`effective_tax_rate`, 2026-01): **blocked** — blocked by critical issue(s) ISS-0001; Book measure only; not a tax computation.; No tax provision booked for the period: profit after tax (net profit) is not stated; profit before tax is shown under its own label. Tax is never estimated.
- Days sales outstanding (`dso`, Q4 FY2025-26): **partial** — Alternative input: net revenue excluding GST used as denominator; DSO is overstated roughly by the tax share because receivables include GST.
- Days payables outstanding (`dpo`, Q4 FY2025-26): **partial** — Alternative input: COGS used as denominator (payables include GST and non-inventory purchases); provide credit purchases including GST for a ready DPO.
- Cash conversion cycle (`cash_conversion_cycle`, Q4 FY2025-26): **partial** — Inherits DSO/DPO limitations.
- Cash and bank balance (`cash_balance`, Q4 FY2025-26): **partial** — Book balance only; no bank statement provided to verify it.
- Average monthly net burn (`net_burn`, Q4 FY2025-26): **needs data** — needs bank_transactions.csv
- Cash runway (`cash_runway`, Q4 FY2025-26): **needs data** — needs bank_transactions.csv
- Receivables aging (`ar_aging` [bucket=total], Q4 FY2025-26): **needs data** — needs ar_open_items.csv
- Payables aging (`ap_aging` [bucket=total], Q4 FY2025-26): **needs data** — needs ap_open_items.csv
- Revenue by customer (`revenue_by_customer` [key=all], Q4 FY2025-26): **needs data** — needs sales_lines.csv
- Revenue by product (`revenue_by_product` [key=all], Q4 FY2025-26): **needs data** — needs sales_lines.csv
- Revenue by channel (`revenue_by_channel` [key=all], Q4 FY2025-26): **needs data** — needs sales_lines.csv
- Customer concentration (`customer_concentration` [key=all], Q4 FY2025-26): **needs data** — needs sales_lines.csv
- Budget variance (`budget_variance` [account_class=all, measure=variance], Q4 FY2025-26): **needs data** — needs budget.csv
- Marketplace / gateway fees (`marketplace_fees` [provider=all], Q4 FY2025-26): **needs data** — needs settlements.csv
- Settlement variance (`settlement_variance`, Q4 FY2025-26): **needs data** — needs settlements.csv

Scope, sources and method

- `trial_balance.csv` (trial_balance): 36 rows, coverage 2026-01-01 to 2026-03-31, SHA-256 651c5f8cb935…
- Formulas: finance-analyst.yaml metrics.registry, formula_version 1.0; spec version 1.3.0; toolkit 0.3.0.
- Amounts exclude GST unless stated. Tables state their scale. ⚠ marks a partial figure; see Limitations.
- Materiality for highlighting movements: two of (≥ ₹25,000; ≥ 10% of base; ≥ 0.5% of net revenue) unless configured otherwise.

Appendix — definitions used in this report

Metric	Definition (formula)	Basis
Gross revenue (`gross_revenue`)	ledger(revenue_from_operations, period)	accrual, amounts excl. GST
Sales returns & allowances (`sales_returns_and_allowances`)	ledger(sales_returns_and_allowances, period)	accrual, amounts excl. GST
Net revenue (`net_revenue`)	gross_revenue + ledger(other_operating_revenue) - sales_returns_and_allowances	accrual, amounts excl. GST
Cost of goods sold (`cogs`)	ledger(cost_of_revenue classes, period)	accrual, amounts excl. GST
Gross profit (`gross_profit`)	net_revenue - cogs	accrual, amounts excl. GST
Gross margin (`gross_margin`)	gross_profit / net_revenue	accrual
Operating expenses (excl. D&A) (`operating_expenses`)	ledger(operating expense classes, period)	accrual, amounts excl. GST
EBITDA (`ebitda`)	gross_profit - operating_expenses	accrual, amounts excl. GST
EBITDA margin (`ebitda_margin`)	ebitda / net_revenue	accrual
Operating profit (`operating_profit`)	ebitda - ledger(depreciation_and_amortisation)	accrual, amounts excl. GST
Operating margin (`operating_margin`)	operating_profit / net_revenue	accrual
Profit before tax (`profit_before_tax`)	operating_profit + other_income - finance_costs - (exceptional + prior_period + fx)	accrual, amounts excl. GST
Cost-to-revenue ratio (`cost_to_revenue_ratio`)	(cogs + operating_expenses) / net_revenue	accrual
Expenses by category (`expense_by_category`)	group_by(ledger(expense classes), class)	accrual, amounts excl. GST
Trade receivables (`accounts_receivable`)	balance(trade_receivables, as_of)	accrual, amounts excl. GST
Trade payables (`accounts_payable`)	balance(trade payable classes, as_of)	accrual, amounts excl. GST
Inventory (`inventory_value`)	balance(inventories, as_of)	accrual, amounts excl. GST
Working capital (`working_capital`)	balance(current_assets) - balance(current_liabilities)	accrual, amounts excl. GST
Outstanding borrowings (`outstanding_debt`)	balance(borrowing classes, as_of)	accrual, amounts excl. GST
Finance costs (`finance_costs`)	ledger(finance_costs, period)	accrual, amounts excl. GST
Debt-to-equity (`debt_to_equity`)	outstanding_debt / (equity + unappropriated current profit)	accrual
Days sales outstanding (`dso`)	avg_balance(trade_receivables) / credit_sales_incl_tax * days(period)	accrual

Metric	Definition (formula)	Basis
Days payables outstanding (`dpo`)	avg_balance(trade_payables) / credit_purchases_incl_tax * days(period)	accrual
Cash conversion cycle (`cash_conversion_cycle`)	dio + dso - dpo	accrual
Cash and bank balance (`cash_balance`)	balance(cash_and_cash_equivalents) [book]	cash, amounts excl. GST

Disclaimer

This analysis is prepared from the data you authorised and provided, using documented methods. It is decision support, not an audit, review, tax, legal or investment opinion. Figures labelled estimate, forecast or hypothesis carry uncertainty. Please review material decisions, tax matters and statutory filings with your Chartered Accountant or other qualified adviser.

GST and income-tax data checks test consistency between datasets only and do not confirm compliance or filing correctness. Items listed for review are screening results, not findings of wrongdoing.

Verification

Check	Status	Details
ver_no_fabrication	passed	all inputs exist with matching hashes
ver_recompute_figures	passed	15 figures recomputed independently and matched
ver_register_tieout	passed	44 rendered figures tie to the register
ver_placeholders_resolved	passed	none left
ver_narrative_raw_numbers	passed	narrative uses placeholders for all figures
ver_cross_footing	passed	statement, aging, budget and variance identities hold
ver_claim_evidence	passed	every finding and recommendation cites valid evidence
ver_claim_topic_consistency	passed	cited figures match the topics mentioned
ver_direction_words	passed	no contradictions found
ver_limitations_disclosed	passed	every non-ready metric is listed under Limitations
ver_masking	passed	no unmasked identifiers detected
ver_boundary_language	passed	no prohibited assurance language
ver_disclaimers	passed	standard disclaimer present
ver_double_count_guard	passed	no bank line or settlement counted twice
ver_conflict_figures	passed	conflict figures recompute
ver_status_consistency	passed	status line counts equal the issue, reconciliation and calculation registers
ver_profit_labels	passed	every profit mention names its level and cites it
ver_savings_claims	passed	no unsupported savings claims
ver_leakage_classification	passed	no recoverable, reversal or timing item called leakage
ver_evidence_separation	passed	verified findings, exceptions, estimates and hypotheses are separated
ver_source_trace	passed	17 figure(s) traced to accounts or source rows and re-added
ver_excel_formulas	passed	15 formulas evaluated independently, 15 equal their register values; LibreOffice: ok (15 compared, 0 mismatches)

Check	Status	Details
ver_chart_data	passed	0 charted value(s) match the register
ver_approval_gates	passed	no external or financial action executed; prepared files match approvals
